

PUNEET SINGH

Product Leader — AI & Enterprise Platforms

Hyderabad, India (Open to roles anywhere in India, Remote) · +91 88610 22273 · Puneet.Singh@iiml.org · linkedin.com/in/puneet-iiml

EDUCATION & CREDENTIALS

MBA (Strategy & Finance) , Indian Institute of Management, Lucknow	2010 – 2012
Exchange Semester (Strategic Management) , University of St. Gallen, Switzerland	2011
B.Tech, Electrical & Electronics Engineering , Indian Institute of Technology, Roorkee	2004 – 2008
Certifications & IP: SAFe® 6.0 POPM · CFA Level I · 3 granted US patents (US9674642B2, US10140356B2, US10496976B2)	

Product leader with 15+ years building SaaS and enterprise platforms in regulated industries — fintech, health-tech and government. **Hired and led a team of 5 PMs** across India, Malaysia and Germany at FICO, governing a **13-module platform portfolio delivered by 6 engineering squads (~72 engineers)**, with functional alignment across product marketing, architecture and sales engineering. Five products taken **0→1 from concept to production**, three of them embedded onsite with enterprise and government customers in the US and UAE.

LEADERSHIP SCOPE

People: Governed delivery across ~72 engineers in 6 squads, with functional alignment across product marketing, architecture and sales engineering; 5 PMs/POs as direct reports (managed KRAs, performance reviews etc.)

Portfolio: 13 API product modules across 6 engineering squads (~72 engineers) spanning India, US and Malaysia; privacy and identity strategy for 75+ enterprise customers in 11 cloud regions.

Stakeholders: Regular CXO exposure — founder/CXO level in startups, business-unit CXOs at Kotak Mahindra, VP and functional-head level at NASCO, and government agency heads in Dubai.

Global: 4.5 years onsite in the United States (2019-2023), onsite engagement with the Government of Dubai, exchange semester at University of St. Gallen, Switzerland, and distributed teams across India, Malaysia, Germany and the US.

EXPERIENCE

INDEPENDENT PRODUCT & AI CONSULTANT

Oct 2025 – Present

Delivering AI products and enterprise AI strategy to enterprises and SMBs. · Hyderabad, India

AI Strategy Consultant — Kotak Mahindra Asset Management

- **Led AI discovery across 5 jurisdictions**, interviewing 40–50 business and technology stakeholders to map process debt and readiness gaps.
- **Framed and prioritised a portfolio of 40+ AI opportunities**; sequenced a phased roadmap starting with high-impact / low-complexity use cases, and instituted an opportunity-review cadence to promote backlog items into delivery.
- **Advised business-unit CXOs** in executive reviews on build-vs-buy trade-offs and roadmap sequencing; ran vendor evaluation and commercial negotiation covering ~\$100K of annual AI spend.
- **Defined the enablement strategy** across individual, team and enterprise adoption; phase one delivered and in renewal discussion for an expanded programme-level charter.

Fractional Director of Product — Emergency care practice (US) (via Block10.ai)

- **Sole product owner for an AI medical-billing platform** automating claim creation from patient records for a ~20-physician emergency practice processing ~450 claims and ~\$2M in billings monthly.
- **Drove the strategy behind a high-accuracy, automated medical-coding engine** (RAG-based, ~80% CPT-code accuracy with a continuous-improvement loop) that became the core driver of faster claims turnaround; instituted post-launch accuracy and rejection reviews to keep the roadmap outcome-led.
- **Client-reported outcomes:** claim turnaround cut from 21 days to 5 days (4x faster claims) and a step-change reduction in coding-related claim rejections.

Experimentation with AI tools

- Build a “PM OS” covering 10 product-research use cases; a multilingual voice stack (STT / LLM / TTS) on open-source models; a child voice companion with parent-review safety guardrails; experiments with agent harnesses and long-term memory pipelines.

FICO — Sr. Manager, Platform Management

Jun 2023 – Sep 2025

FICO® Platform (AI decisioning / decision management) · Bengaluru, India

- **Hired and led a team of 5 PMs/POs** distributed across India, Malaysia and Germany — owning their KRAs, goals and performance reviews — while retaining hands-on ownership of core modules.
- **Owned a 13-module API portfolio** covering customer onboarding, user provisioning, identity, security and privacy — delivered by 6 engineering squads (~12 engineers each) across India, the US and Malaysia, and setting privacy strategy for 75+ enterprise customers in 11 cloud regions.
- **Cut enterprise onboarding from 21 days to 2** by shipping a self-service headless CIAM platform — SAML/OIDC federation, token-based auth, MFA, risk-based and continuous authentication. First self-onboarded cohort included two banks and a card processor.

- **Decoupled AuthN from AuthZ** to unlock flexible enterprise access models; defined payment-tokenisation requirements and led delivery of high-throughput API services to meet PCI-DSS.
- **Partnered with a 72-member identity and security organisation** to sequence the roadmap and land delivery across the platform.

IT PEOPLE INC. — Embedded Product Manager to enterprise & government clients

Jul 2016 – Jun 2023

Full-time employee placed as the product manager inside client organisations · USA · UAE · India

Product Manager — NASCO Inc., AccumXChain

Morrisville, NC · Sep 2021 – Jun 2023

- **Framed a \$1B+ industry reconciliation problem** — over-billing forces payers to refund members and recover from providers, driving rework cost and poor experience — and built the strategic business case for a shared real-time accumulator platform, securing executive buy-in from client IT leadership at VP and functional-head level.
- **Owned delivery of a multi-tenant blockchain-based cloud platform** connecting health plans, hospitals, pharmacies, PBMs and payment processors, architected for 200M+ transactions a year.
- **Led a 10-engineer team** and stood up agile from zero — definition of done, sprint cadence, CI/CD, containerisation, DR planning and monitoring; shipped v1 in 8 months and piloted with 4 BCBS plans, 2 PBMs and NASCO as claim processor.

Product Manager — TARS, Roads & Transport Authority (Govt. of Dubai)

Dubai · Feb 2020 – Sep 2021

- **Took a greenfield national regulatory platform from zero to launch in 12 months**, owning strategy, process discovery, workflow mapping and roadmap for the digital car-rental contract lifecycle — delivered bilingual in English and Arabic.
- **Built consensus across competing public and private stakeholders** — Dubai transport authority, Salik tolling, law enforcement, rental operators and fleet-service providers — to agree a single regulated workflow.
- **Led blockchain delivery for the engineering team** alongside the product role.
- **Outcomes:** \$2.5M revenue in the first month, reduced cross-emirate revenue leakage, and 1,000+ rental companies onboarded at launch. The platform now processes 900,000+ contracts a year.

Product Manager — Trust Your Supplier

Morrisville, NC · Apr 2018 – Aug 2021

- **0→1 product owner** for a SaaS platform issuing self-sovereign digital identity to 170K+ suppliers — qualification, onboarding and lifecycle management for IBM and Lenovo. Built the product vision with the CEO and reached GA in 8 months.
- **Handed the core product to a newly hired PM and mentored them**, then took ownership of partner capability — onboarding 7 integration partners including Dun & Bradstreet, RapidRatings and EcoVadis in year one.
- **Co-architected the data refresh and retention strategy** and tracked activation metrics to drive supplier-activation roadmap decisions.

Product Manager — IBM, BEAM

Morrisville, NC / India · Jul 2016 – Mar 2019

- **Product lead for IBM's first enterprise-grade blockchain platform** for tracking and tracing physical and digital assets — leading a 12-person team (dev lead, 5 engineers, 2 DevOps, 3 QA, scrum master) and coordinating delivery with the client.
- **Delivered \$2M in operational savings** through IoT-enabled traceability, and defined a “Golden Copy” device-configuration data model that cut support resolution time 45% and support cost 25%.
- **Piloted across 30K hardware assets and 100K+ annual transactions** with 5+ IBM and Lenovo manufacturing sites; became the foundation for IBM Supply Chain Intelligence Suite.

WIPRO CONSULTING SERVICES — Senior Consultant → Assistant Manager

May 2012 – Jul 2016

Product Strategy, Innovation & Research · Bengaluru, India

- **Product owner for the Lloyds Banking Group (UK) co-innovation lab** — ran discovery and prototyping across blockchain, AI/ML, AR and IoT with 3 BAs and 5 engineers, and advised the client's Innovation & Research Head on emerging-technology investment. The engagement generated £2M+ in fees over 2.5 years, contributed to Wipro's selection as 1 of only 2 preferred vendors for a \$3B portfolio, and produced 12 patents — 3 authored by me.
- **Led new-product identification for Boston Scientific's emerging-markets surgical portfolio**, conducting 12 ethnographies of live surgeries to surface unmet surgeon needs; the work seeded Wipro's dedicated Healthcare & Medical Devices Design Studio.
- **Additional strategy engagements:** India market-entry plan for Pitney Bowes anti-counterfeiting products; market sizing for Philips India; 3D-printing GTM plan presented to Wipro's CEO.

EARLIER

2008 – 2015

Co-founder & CTO, Knowledgify Solutions (2012–15) — Ivyctor.com, an MBA admissions advisory service, and theSATclub.com, India's first SAT discussion platform; product owner for the mobile app, website and forum.

Reliance Industries — MBA Intern (2011): GTM strategy and financial model for petcoke as an industrial fuel substitute.

Freescale Semiconductor — Design Engineer (2008–10): IP design and design-for-testability for industry leading 8-core network processor.

Speaking: Linux Foundation tokenization workshop, Morgan State Fintech Center (700+); Blockchain Technology Conference and Unicom Blockchain Summit, Hyderabad
